

County Public Health Department Services

There are many public health services available to Applegate residents through both the Jackson and Josephine County Public Health Departments. The mission of the Public Health Departments is to provide public services that protect and promote the health and well being of county residents through health education and disease prevention. Available services include:

- **Immunizations:** Childhood and adult immunizations available at low cost, including Hepatitis B, MMR (measles, mumps and rubella), Polio, Tetanus/Diphtheria, and Varicella (chicken pox)
- **Travel Vaccines for foreign travelers:** Available vaccines include Hepatitis A, Malaria, Meningococcal Meningitis, Rabies, Typhoid and Yellow Fever
- **Communicable, Preventable Disease Control:** Tuberculosis testing and confidential testing for sexually transmitted diseases
- **Breast and Cervical Cancer Screening Program:** Breast and cervical cancer screening services for eligible women age 50 and over. Women under age 50 may be eligible if they are symptomatic for breast or cervical cancer
- **Family Planning Services,** including free or low cost confidential pregnancy tests
- **Mental Health Services:** Information, screening and referral to mental health community resources
- **Perinatal Program:** Provides nursing case management services to pregnant teens, and women who are at risk of poor pregnancy outcomes

- **Public Health preparedness:** Coordinates emergency and disaster response plans
- **WIC (Women, Infant and Children) Program:** Eligible women and children receive nutrition education and monthly vouchers for supplemental foods
- **Vital Records:** Birth and death reporting, recording and registration

Many Public Health services are provided at no cost to the recipient. Currently, both County Health Departments have ample supplies of H1N1 flu vaccine available free of charge.
